

True Project Collaboration with Submittal Exchange

Submittal Exchange® is a comprehensive, secure online system for electronically exchanging, reviewing and archiving construction submittals, RFIs and other communications. Take your construction administration process to the cloud and save time, reduce costs and decrease the immense amount of paper associated with construction projects. In the cloud your project team will experience increased transparency, consistency and accountability, resulting in fewer delays and lower project costs.

Design More Efficiently

- ✓ Review & markup 1 electronic copy
- ✓ Step by step document version history
- ✓ Automatic reminders to keep reviewers on track
- ✓ Track & exchange all construction documents

Collaborate More Effectively

- ✓ Quickly transfer documents between reviewers
- ✓ One central location of all documents
- ✓ Reduce administration time by up to 50%
- ✓ System is user-friendly and very easy to learn

Project Manage More Profitably

- ✓ Eliminate shipping & courier services
- ✓ Central list of all project required items
- ✓ Reduce paper copies during construction
- ✓ Searchable electronic archive provided

What our customers are saying

"Submittal Exchange is a great collaboration tool, communication tool, to use with the whole project team including contractors, architects, engineers, and owners. It's very successful and very smooth."

Rob Brandwick
HTG Architects

"We have seen a vast reduction in our need for paper. We have saved days on transportation & shipping with everything being electronic – the entire process has been made much easier."

Mike Reese
The McCarty Companies

"I would estimate I save 10-20 minutes per submittal using Submittal Exchange by the time you figure in copying, shipping, and inter processes. It saves significant time."

Merilyn Romoff
Graham Construction Company
